

Prectect D 20kg

Is an Innovative Phyto molecule offering Natural solutions for mitigating and Controlling Coccidiosis and gut health issues during challenging situations

Benefits

- Controls Coccidiosis in all poultry breeds and ages.
- Enhances immune response in affected flocks.

Adimix[®] Precision 25kg

Designed to deliver Sodium Butyrate to poultry and swine.

Benefits

- Enhanced performance and general health of the animals.

Smartamine M 25kg

Rumen- stable, abomasum-dispersible methionine product for ruminants. It is produced using a unique patented process.

Benefits

- Improves milk volume, proteins and fats
- Improves fertility in dairy herd

NIR Services

We analyze the common raw materials used in making animal feeds for the following parameters;

- Proximates
- Total amino acids
- Digestible amino acids
- Total, phytic and available phosphorus
- Apparent metabolizable energy

Smartamine ML 25kg

A rumen protected Lysine for Ruminants produced using unique patented process.

Benefits

- Improves milk volume, proteins and fats
- Improves fertility in dairy herd

L- Lysine Sulphate 70% 25kg

One of the limiting amino acids in poultry and pigs which is a building block of proteins.

Premixes

- Chick Starter Premix
- Poultry Grower Premix
- Pigmented Layer Premix
- Dairy Cattle Premix
- Pig Finisher Premix
- Fish Premix
- Breeder Premix
- Broiler Finisher Premix
- Layer Premix
- Sow & Weaner Premix
- Dog Premix

Services

- NIR Services
- Mycotoxin Analysis
- Feed formulation
- OPGenius Kit

Amino Acids

- L-Lysine HCL 99%
- DL-Methionine 99.3%
- L-Lysine Sulphate 70% on dry basis
- Threonine 98.5%
- Liquid Methionine

Coccidiostats

- Salinomycin Sodium (6%)
- Prectect D

Feed Additives

- Canthacol Orange (Egg Yolk Pigment)
- Adisodium (Sodium sulphate 99%)
- Choline Chloride 60%
- Dicalcium Phosphate
- Formycine Gold Px
- Creamino

Mycotoxin Deactivators

- Unike plus
- Toxynil

Probiotics

- Alterion

Phytogenics

- Ventar D

Feed Digestibility

- Rovabio Max Advance
- Nutriferm
- Yeast culture

Rumen Protected Amino Acids

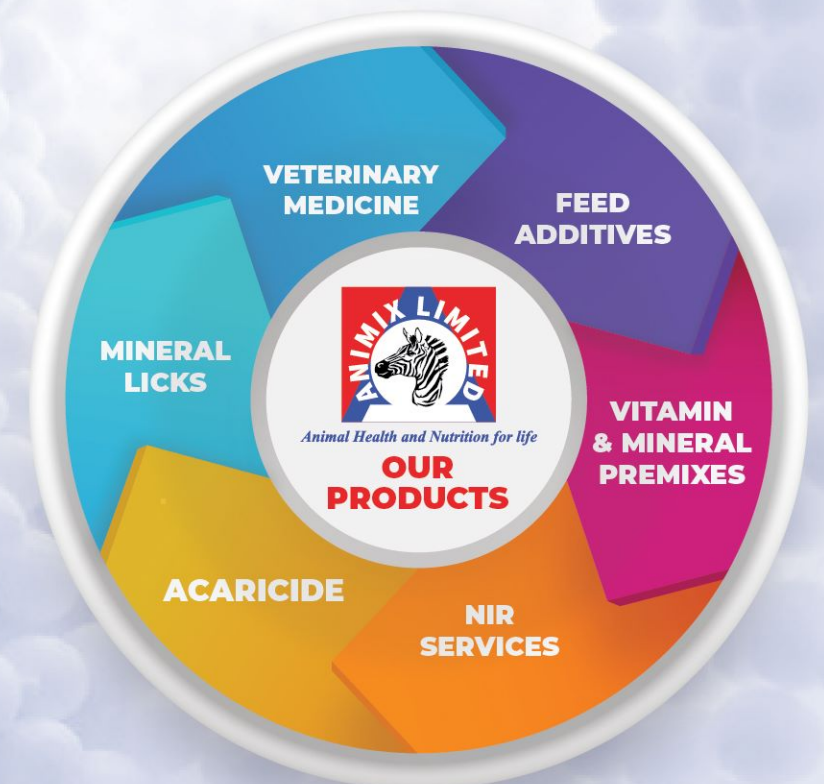

- Smartamine ML
- Smartamine M

Animal Health and Nutrition for life

Animix Limited

P.O. Box 1-00515 Nairobi Kenya • Tel: 0712 758 692
Email: animix515@gmail.com

Our Mission

Is to improve the health and performance of animals by providing innovative and natural solutions.

Our Vision

Is to improve the quality of life for animals by supporting adequate and healthy food through proper nutrition of animals. We strive to set the standard for quality, safety and value in the development and supply of innovative products.

Creamino 25kg

Energy for Healthy Growth

Creamino® is a feed additive for animals, which is naturally processed into creatine after absorption into the body.

Benefits

- Creatine is important for the energy balance of the cell.
- Provides additional energy for healthy growth.

Alterion® 25kg

Alterion® is a new probiotic solution, designed to bring consistent efficacy to poultry livestock. Made of a carefully selected strain of Bacillus subtilis, acts on the gut microbiota to have a beneficial dual action which improves both performances and microbial balance, in a consistent way.

Benefits

- Proven results from poultry herds around the world
- Uses a one-of-a-kind strain of Bacillus subtilis
- Works as a natural alternative to antibiotic growth promoters
- Gives farmers better control over poultry gut health
- Optimizes the feed conversion ratio by 2-2.5%

Ventar D 20kg

Ventar D, a next-generation formulation with a next-generation delivery system, provides market-leading production performance through improved gut health, reliably and cost-efficiently.

Benefits

On top of its excellent antimicrobial, antioxidant and anti-inflammatory benefits, its original encapsulation delivers optimal thermal stability and a targeted release, for unparalleled best-in-class activity inside the gut.

Nutriferm® 25kg

Blend of Aspergillus species with fibre digesting enzymes along with Structural polysaccharides. Daily supplementation in the feed to manage Sub-Acute Ruminal Acidosis, poor fibre digestion and low fat in the milk

Benefits

- Improves fiber digestion
- Improves feed intake and digestibility
- Stabilizes rumen PH irrespective of the change in feed and season
- Minimise fluctuation in Milk production
- Increase milk fat %
- Maintains normal health of dairy animals during peak production and stress conditions

Rovabio® Advance Phy T

Rovabio Advance Phy T 20kg

The Unique NSP Enzymes with 20 characterized enzyme activities; Phytase, Debranching Enzyme, Pectinase, Xylanases, Cellulases, β -glucanases, Proteases and Others.

Benefits

Improves the digestibility of all feed nutrients including amino acids, phosphorus, and calcium, thereby increasing the dietary nutritional value of the feed.

Formycine Gold Px® 25kg

Protect your feed and feed ingredients

Provides effective control of bacteria, mold, viruses and yeast. It is fast-acting and does not leave residues in meat or final products.

Benefits

- Improved health and feed efficiency
- Reduced veterinary costs for on-farm treatment
- Reduced wet litter and environmental ammonia
- Optimized overall production performance

Toxynil® 25kg

The product is a carefully manufactured mixture of additives, specially designed for animal feeds. High adsorbent modified clay minerals, yeast and fermentation extracts, antioxidant and preservative mixture of botanicals.

Benefits

- Effective protection against a broad spectrum of mycotoxins
- Protect & detoxify the liver, boost immunity
- Improves animal fertility and performance

Unike Plus® 25kg

A broad spectrum mycotoxin deactivator that acts against all categories of mycotoxins.

Benefits

- Best solution against broad-spectrum mycotoxin contamination in feed
- Supports optimal functioning of the immune system, reproductive and digestive systems
- Allows liver, GIT, kidneys, and other organs to function without interference from toxins
- Sustains high levels of animal fertility and overall performance

Liquid Methionine®

Rhodimet AT88

- This contains 88% DL-HTMBA and 12% water.

Benefits

- Same bioequivalence and efficacy as powder methionine
- 20 billion broilers worldwide are on liquid methionine annually
- It is heat stable – the structure cannot be affected by pelleting temperatures
- Cost-effective solution for feed mills- less waste
- Excellent homogeneity

PLUG & SPRAY
Rhodimet®

Mycotoxin Analysis Laboratory®

Outstanding accuracy and reproducibility

We test for the most prevalent Mycotoxins;

- Aflatoxin
- Deoxynivalenol
- Fumonisin
- Zearalenone
